

SKILLS

- Data Structure & Algorithm
- Problem Solving
- DBMS
- SQL
- C/C++
- Python
- JavaScript
- Dart
- LangChain/LangGraph
- Django REST/ GraphQL
- React
- Flutter
- Docker
- Elasticsearch
- Jenkins
- Ubuntu
- Nginx
- Unicorn
- AWS
- Firebase

PROFESSIONAL EXPERIENCE

Innoweb Limited

Senior Software Engineer • Feb 2023 - Present

- Robo2mation (Process Flow & Document Management System)

- Redesigned the system from a single-tenant to **multi-tenant SaaS** architecture, improving resource efficiency by **60-70%**. Upgraded the **database** and **Elasticsearch** infrastructure to ensure secure, high-performance **multi-tenant** support. Additionally, calculated and defined **server specifications** (RAM, CPU, storage and cost) while designing for both high-load and low-load scenarios to ensure scalability, reliability, and optimal system performance.
- Ensured application **high availability** by implementing **database replication**, enabling failover support and improved system reliability.
- Built **AI-driven RAG Q&A** prompts and **AI Workflow Generator** for automated, faster, and more efficient customer service.
- Reduced development time by **15-20%** by designing and developing a **no-code platform** encompassing **third-party API integration** system, **Master Table** feature for **dynamic tables**, and **dynamic eForm condition** building.
- Implemented **CI/CD pipeline** using **Jenkins** to automate deployment, improving development and testing speed and reliability.
- **Contributed** to improving **development processes** and **best practices** while mentoring the team on **code management**, linting, and version control

Innoweb Limited

Software Engineer • Aug 2020 - Jan 2023

- Robo2mation (Process Flow & Document Management System)

- Reduce deployment costs by **15-20%** by implementation of **containerization** using **Docker** technology for the web application
- Helping to re-design the **back-end architecture** of the Robo2mation application
- Various **REST APIs & features** implementations with **Django, Django REST & JavaScript**. Familiar with **GraphQL & ReactJS** as well
- Implementation of **Authentication** and **Authorization** functionalities with **JWT** (JSON Web Token)
- Enhance **full-text search** (search as you type) capabilities and Increased **search performance** by almost **65-70%** by integrating **Elasticsearch**
- Enhance the **user experience** by **20-25%** by integrating **Microsoft authentication** into the web application
- Built Robo2mation **mobile app (Android & IOS)** with **Flutter** and published to **Play Store** and **App Store**
- Integrating **Firebase** services to facilitate **push notification** transmission and **remote configuration** management for the **Robo2mation mobile app (Android & IOS)**
- **Improving** application functionalities & performance by **65-70%** by **Troubleshooting** and **resolving** software **bugs**

Infosapex Limited

Software Engineer • Sep 2019 - Jun 2020

- Amarroom.com (mobile app), Property Management System (PMS)

- Built **token-based authorization** system using **JWT** (JSON Web Token) with **Django REST** for PMS mobile app
- Built **REST APIs** for PMS mobile app with **Django REST** framework
- Built various key features of **PMS** web app
- Built (**Flight Booking** and **Payment Gateway**) features for the amarroom.com **mobile app (Android & IOS)** with **Flutter**

PROBLEM SOLVING

- GFG/Leetcode - **450+** problems solved [[GFG](#)][[Leetcode](#)]
- Codeforces - **250+** problems solved [[Codeforces](#)]
- UVA Online Judge - **100+** problems solved [[UVA](#)]

EDUCATION

Bachelor of Science in Computer Science & Engineering

Institute of Science and Technology • 2019

CGPA **3.05** out of **4.00**
